

The Global Standard in Image Recognition for the CPG Space

Real-Time Feedback

Visit & Capture

Sales reps simply scan the shelves during their routine store visits – No extra effort, just a smarter workflow.

Instant Feedback

We instantly process the data, updating your database in real time – no more delays, no more blind spots.

Act & Optimise

You get instant execution insights, enabling smarter, faster decision-making.

About the Company

Founded in 2018 by AI researchers in Edinburgh, Neurolabs was created to solve a fundamental challenge in retail execution: **visibility at scale.**

32% reduction in field operational costs

10% increase in site visits per rep per day

40% reduction in audit time

“

With the previous vendor we couldn't go from in-store to backroom, or from product recognition to price recognition. With Neurolabs we could do all these leveraging the same technology and catalog.
